Objective and Investment Policy

This Sub-Fund is passively managed. The objective is to track the performance of "S&P 500 Equal Weight Index" (the "Index") denominated in USD, in order to offer an exposure to an equal-weight version of the S&P 500 Index which represents the largest companies listed in the United States, while minimizing the volatility of the difference between the return of the Sub-Fund and the return of the Index (the "Tracking Error"). The anticipated level of Tracking Error under normal market conditions is indicated in the Prospectus of the Sub-Fund. The Index is designed to be a size-neutral version of the S&P 500 Index and includes the same constituents as the cap-weighted S&P 500 Index but each company in the Index is allocated the same weight at each quarterly rebalancing, rather than weighted by float-adjusted market capitalization. The Index is a net total return index, meaning that dividends net of tax paid by the index constituents are included in the Index return. The complete methodology for the Index (including maintenance and rebalancing of the Index) is available for consultation on the website: https://www.spglobal.com/spdji/. The Index value is available via Bloomberg (SPXEWNTR). The Sub-Fund will apply an Indirect Replication methodology to get exposition to the Index. The Sub-Fund will invest into a total return swap (financial derivative instrument) delivering the performance of the Index against the performance of the assets held. Derivatives are integral to theSub-Fund's investment strategies.

Any losses or gains do not take into consideration any costs, commissions and fees incurred by the investor in the issue and buyout of the shares (e.g. taxes, brokerage fees or other commissions deducted by the financial intermediary). If performance is calculated in a currency other than the euro, any losses or gains generated can thereby be affected by exchange rate fluctuations (both upward and downward). The discrepancy accounts for the performance difference between the portfolio and the index.*
